

Concept Development

Innovation and development of recipes is a constant process.

At EBIC a variety of new products and complete concepts are developed and tested. Research can also be conducted into new raw materials, if desired in collaboration with ingredient suppliers. This can be done on your behalf or in collaboration and if you wish the testing can be done completely independently

Date and Time

Entire year

Program

not relevant

Audience

- Industrial bakeries
- Artisanal bakeries
- Raw materials suppliers

Cost

The costs of concept development depends on your wished and requirements. Contact us for a quotation.

Extras

The results of the conceptdevelopment, conclusions and recommendations are presented in a report with clear graphic views for all aspects. If desired we can present the results during a presentation to your department, principal or management.
